COMPANY OVERVIEW

TECHNICAL OVERVIEW

PRODUCT DESCRIPTIONS

UPCOMING PROJECTS QDIS (since 2005~) is the leading manufacturer of automotive video interfaces, Android integrated solutions, and also bigger size multimedia monitor products for replacement.

We've exported products to over 40 countries and distributed them to the automotive PDI business, car dealers, and on/offline distributors.

A company equipped with automotive CANBUS, LIN, and UART communication technology and embedded OEM CID screen interfacing solutions to display external audio and video sources, such as DVD player, TV tuner, Android set-top, mirroring, CARPLAY, Android Auto, AHD rear view cameras, etc. to the various automotive brand original car monitors.

A total automotive multimedia solution provider with hardware, firmware, Android, and Linux software skills to realize better driving experience for various car makers, such as Mercedes-Benz, BMW, AUDI, Lexus, Porsche, Land Rover, etc.

We've reached an annual exportation of over USD 10,000,000 in 2012.
